Thin Solid Films, 174 (1989) ix–xii

Contents

FILM DEPOSITION AND POST-DEPOSITION TREATMENT

Novel organometallic starting materials for group III–V semiconductor metal–organic chemical vapour deposition 1
M. Hostalek, L. Pohl (Darmstadt, F.R.G.), A. Brauers, P. Balk, V. Frese, H. Hardtdegen, R. Hövel, G. K. Regel (Aachen, F.R.G.), A. Molassioti, M. Moser and F. Scholz (Stuttgart, F.R.G.)

Reactions of $YBa_2Cu_3O_{7-x}$ thin films on silicon substrates 5
M. Scheib (Kaiserslautern, F.R.G.), H. Goebel, L. Hofmann (Munich, F.R.G.), B. Lengeler (Jülich, F.R.G.), H. Oechsner (Kaiserslautern, F.R.G.) and G. Zorn (Munich, F.R.G.)

Phase sequence in the solid state amorphization reaction of metallic thin films* 11
S. Schneider, H. Schröder, K. Samwer (Göttingen, F.R.G.), B. Schuhmacher and U. Köster (Dortmund, F.R.G.)

Structure and properties of thin films of amorphous aluminium based alloys prepared by sputtering 25
M. Benmalek, P. Sainfort and G. Regazzoni (Voreppe, France)

Modification of surface films on metallic substrates by excimer laser irradiation 33
H. W. Bergmann, E. Schubert, K. J. Schmatjko and J. Dembowski (Erlangen, F.R.G.)

Generation of surface layers and microstructures with a low energy plasma beam source 39
J. Waldorf, H. Oechsner, H.-J. Füßer (Kaiserslautern, F.R.G.) and J. Mathuni (Munich, F.R.G.)

Solid state reaction in crystalline and amorphous Co–Zr multilayers 45
F. Stobiecki (Poznan, Poland), T. Stobiecki (Krakow, Poland), H. Hoffmann (Regensburg, F.R.G.), J. Dubowik and Yu. V. Kudryavtsev (Kiev, U.S.S.R.)

On spinodal decomposition in magnetron-sputtered (Ti,Zr) nitride and carbide thin films 51
O. Knotek and A. Barimani (Aachen, F.R.G.)

* Invited paper.

Plasma-enhanced chemical vapour deposition of silicon dioxide using tetra-ethoxysilane as silicon source 57
W. Kulisch, T. Lippmann and R. Kassing (Kassel, F.R.G.)

Growth of GaAs and AlAs thin films by a new atomic layer epitaxy technique . . 63
M. Ozeki, K. Mochizuki, N. Ohtsuka and K. Kodama (Atsugi, Japan)

Preparation of polycrystalline $Cd_{1-x}In_xCr_2Se_4$ thin films. 71
M. Lubecka and W. Powrożnik (Krakow, Poland)

Quantitative comparison of a tungsten and a tantalum cracker cell for epitaxy with arsine 75
C. Lohe and C. D. Kohl (Aachen, F.R.G.)

Preparation of multinary thin films by mass spectrometer control 79
B. Dimmler (Stuttgart, F.R.G.)

Characterization of silver-doped perovskite- and spinel-type electrode coatings 85
G. Schiller, K. Bolwin and W. Schnurnberger (Stuttgart, F.R.G.)

Diode r.f. sputtering of copper and copper oxide thin films and multilayers . . 91
P. Boher, P. Houdy, C. Schiller (Limeil-Brévannes, France) and L. J. van Ijzendoorn (Eindhoven, The Netherlands)

Surface accumulation and monolayer coverage during grain boundary diffusion in polycrystalline Cu/Ni bilayers 99
R. Venos and H. Hoffmann (Regensburg, F.R.G.)

NUCLEATION AND THIN FILM ANALYSIS

X-ray diffraction studies on thin palladium films epitaxially grown on Ag(1111) . 105
K. Häupl and P. Wißmann (Erlangen, F.R.G.)

Study of thin oxidation films on iron alloys by Raman spectroscopy 111
N. Boucherit, A. Hugot-Le Goff, S. Joiret (Paris, France), G. Beranger and H. Chaudanson (Compiègne, France)

Elemental analysis of surfaces and thin films* 117
K.-H. Müller (Kaiserslautern, F.R.G.)

Absolute depth profiling of thin film systems by low energy secondary neutral mass spectrometry 133
A. Wucher, H. Oechsner (Kaiserslautern, F.R.G.) and F. Novak (Yorktown Heights, NY, U.S.A.)

Sputtering of TiN coatings during ion beam mixing 139
W. Bolse, Th. Corts, Th. Weber, M. Uhrmacher and K. P. Lieb (Göttingen, F.R.G.)

Sputtering effects in Auger depth profiles of TiN thin films 143
W. Palmer, M. Hüttinger and W. Bensch (Munich, F.R.G.)

Work function spectroscopy as a tool for thin film analysis 149
G. Bachmann, W. Berthold and H. Oechsner (Kaiserslautern, F.R.G.)

* Invited paper.

Aluminium metallization of polyester and polypropylene films: properties and transmission electron microscopy microstructure investigations 155
J. Weiss, Ch. Leppin (Freiburg, F.R.G.), W. Mader and U. Salzberger (Stuttgart, F.R.G.)

Characterization of thermal and deposited thin oxide layers by longitudinal optical–transverse optical excitation in Fourier transform IR transmission measurements 159
P. Lange and W. Windbracke (Berlin, F.R.G.)

ELECTRICAL AND ELECTRONIC PROPERTIES

The sputter deposition of superconducting ceramics* 165
J. E. Evetts and R. E. Somekh (Cambridge, U.K.)

Superconducting properties of irradiation-induced effects in epitaxial YBaCuO thin films 179
B. Roas, B. Hensel, G. Endres, L. Schultz and G. Saemann-Ischenko (Erlangen, F.R.G.)

Optimization of rapid thermal processing to prepare superconducting Y–Ba–Cu–O thin films. 185
H.-U. Habermeier, S. Kalt, G. Wagner and G. Mertens (Stuttgart, F.R.G.)

Amorphous silicon deposition: industrial and technical challenges* 193
J. P. M. Schmitt (Putzbrunn, F.R.G.)

Electronic characterization of new c-Si/a-Si:H/Pt thin film devices 203
S. Belkouch, E. Gheeraert and A. Deneuville (Grenoble, France)

Comparison of amorphous and crystalline $(Ti,Nb)O_2$ thin films: crystallization microstructure and electrical properties 209
F. Picard-Lagnel, B. Poumellec and C. Picard (Orsay, France)

Scattering of charge carriers in transparent and conducting thin oxide films with a non-parabolic conduction band 217
T. Pisarkiewicz, K. Zakrzewska and E. Leja (Krakow, Poland)

Metal–insulator transition in thin granular palladium–carbon mixture films . 225
A. Carl, G. Dumpich and E. F. Wassermann (Duisburg, F.R.G.)

Destruction of the two-dimensional mixed state in superconducting cylindrical tin films 229
E. Holguin (Lausanne, Switzerland)

Electrical and photoconducting properties of vacuum evaporated pure and silver-doped CdSe films 233
K. C. Sathyalatha, S. Uthanna and P. Jayarama Reddy (Tirupati, India)

Inert gas dilution: an alternative technique to make layers for a-Si:H solar cells . . 239
M. T. Gutiérrez and J. Cárabe (Madrid, Spain)

* Invited paper.

Effect of hydrostatic pressure on resistivity of InSb thin films heavily doped with group VI elements 245
T. Berus and M. Oszwałdowski (Poznan, Poland)

Deposition and properties of high critical temperature superconducting ceramic thin films 249
W. Kula, R. Sobolewski, P. Gierłowski, G. Jung, A. Konopka, J. Konopka and S. J. Lewandowski (Warsaw, Poland)

Characterization of ion-beam- and magnetron-sputtered $YBa_2Cu_3O_{7-x}$ high T_c superconducting films by secondary neutral mass spectrometry depth profiling 255
C. Mössner, K.-D. Ufert, P. Köpfer, V. Rupertus and H. Oechsner (Kaiserslautern, F.R.G.)

High T_c superconducting films obtained by pyrolysis of an ultrasonically deposited gel 263
M. Langlet, E. Senet, J. L. Deschanvres, G. Delabouglise, F. Weiss and J. C. Joubert (Saint Martin d'Hères, France)

Thin oxide films as gas sensors 269
Z. Szklarski, K. Zakrzewska and M. Rekas (Krakow, Poland)

Influence of gas atmosphere on thermopower measurements in tin oxide thin films 277
T. Pisarkiewicz and T. Stapinski (Krakow, Poland)

Effect of stress on the superconducting properties of $CoSi_2$ thin films 285
A. Briggs (Grenoble, France), J. Chroboczek, F. Arnaud d'Avitaya and P. A. Badoz (Meylan, France)

Deposition and characterization of $ZrTe_x$ thin films 289
S. Caune, Y. Mathey and D. Pailharey (Marseilles, France)

A comparison of the sulfide–polysulfide and ferro–ferricyanide electrolytes in a photoelectrochemical cell with electrochemically deposited CdSe films . . . 295
M. T. Gutiérrez and J. Ortega (Madrid, Spain)

Anomalous low-temperature resistivity behavior of quench-condensed palladium films 301
R. Huber and P. Ziemann (Konstanz, F.R.G.)

NEW EQUIPMENT FOR FILM PRODUCTION AND INVESTIGATION

Progress in monitoring thin film thickness by use of quartz crystals 307
E. Benes, M. Schmid (Vienna, Austria) and G. Thorn (Hanau, F.R.G.)

New aspects in modern production equipment for III–V processes 315
R. K. Schreiner, M. Deschler and H. Jürgensen (Aachen, F.R.G.)

Sensor for the detection of the incident point of an electron beam 323
M. Groeschl, E. Benes, E. Schmidt (Vienna, Austria), H. Siegmund, G. Thorn and W. Thomas (Hanau, F.R.G.)
